Hi Marc,

I recommend we set up a meeting with ORSANCO to discuss and include Region 5 (Carole Braverman) along with Brian and Tom. Carole can then loop in others from Region 5 and coordinate with the congressional folks. Does this approach work for everyone?

Kelly

Folks... as I suspected, this is getting complicated. I am happy to connect ORSANCO with our SME, Brian Gullett and Tom Speth. But especially as it relates to coordinating with Reg 5 and Congressional liaisons, maybe this should all be handled by the Region. Then they can tap into Brian (and Tom if needed). If folks agree, I don't mind calling ORSANCO to be sure they are good with it... thoughts?

Correction: R5 and ORSANCO are on the same panel. Any messages we develop will need to go through OCIR. The congressional Liassons will coordinate this review.

Subject: RE: East Palestine - D/F technical inquiry from ORSANCO

Hello,

I gave R5 a heads up on this request. The region has asked to be looped in as messages are developed. Please include Eileen Deamer and Ronna Beckmann who are the congressional Liaisons; as well as Carole Braverman for technical input. . The R5 RA is scheduled to testify at the same hearing but a different panel so it's important that the messages be coordinated.

Thanks,

Kelly

Re: Dioxin/Furan production and fate

Looping in folks. Pls read the string.

Marc - Brian Gullett in CEMM is the right person for this so pls let ORSANCO know Brian is the SME to work with.

Brian's mobile: Ex. 6 Personal Privacy (PP)

Kelly - pls let the EOC know about this.

Thanks,
Greg

Apologies. D/Fs = Dioxins/Furans. D/Fs may be produced during the combustion of vinyl chloride. ORSANCO has been asked about the risk to drinking water from the possible production and deposition of D/Fs into the Ohio River. Richard Harrison (ORSANCO) is looking for a subject matter expert to answer questions in this regard prior to his congressional testimony.

Subject: D/F technical inquiry from ORSANCO

Greg and Tom

While here in San Antonio at an Air Force PFAS meeting, I just received an urgent call from Richard Harrison from ORSANCO. He is being called to testify in Congress next week as to the potential for D/Fs to be deposited in the Ohio River from the burning of VC at the train derailment in Ohio. And potential risks to drinking water and other risk pathways. I have done some work on D/Fs but more focused on sediment remediation and limiting exposure through the food web. I told him I am not the SME regarding generation and deposition of D/Fs but would reach out within EPA.

I am in San Antonio with an OLEM contingent and will check with them at the next break. I am reaching out to you both to provide your suggestions as to ORD resources that may be available for ORSANCO to tap into. They also acknowledged that they have been in touch with Reg 5 with a similar request.

I will be heading the airport shortly but told Richard I would update him tomorrow with any progress on an SME to help ORSANCO.

Thank you
Marc
